**37 CFR § 1.175 STATEMENT OF INOPERATIVENESS
OF ORIGINAL PATENT (INVENTOR)**

Applicants, Kenneth A. Parulski, Thomas A. Napoli and David M.
Lewis declare that:

We have reviewed and understand the contents of the specification,
including the claims, of the attached reissue application.

We believe ourselves to be the original, first, and joint inventors of
the subject matter claimed in ELECTRONIC STILL CAMERA FOR
CAPTURING AND CATEGORIZING IMAGES for which we solicit a patent,
described and claimed in our original Letters Patent No. 5,633,678 ('678 patent),
issued May 27, 1997, based on U.S. Patent Application Serial No. 574,756, filed
December 20, 1995 and for the attached specification for which invention we
solicit a reissue patent. As to the subject matter of the application, we do not
know and do not believe that this subject matter was ever known or used in the
United States prior to our invention or discovery thereof. We have the following
citizenship, residence and post office addresses:

We believe that our issued '678 patent is partly inoperative by reason of our claiming less than we had a right to claim in that the claims are limited to a *user* control for selecting one or more categories for the images *before* the images are captured whereas the invention has much broader applications. The invention was disclosed to the patent attorney who wrote the application using a *user* control for selection of one or more categories *before* the images are captured as an example of this invention and as the embodiment which had immediate commercial interest. We believe that one skilled in the art, after reading our issued '678 patent, would clearly understand that selecting one or more categories for the images does not have to be performed *before* the images are captured, and that the control for the selection does not have to be a *user* control. The claims actually prosecuted in the original application were, by mistake, inadvertently all directed to the *user* control for category selection *before* image capture embodiment.

The present reissue application overcomes the inoperativeness of the patent.

We acknowledge our duty to disclose to the United States Patent and Trademark Office all information known to each one of us to be material to patentability as defined in 37 CFR 1.56.

The errors arose without any deceptive intention on our part.

As named inventors, we hereby appoint the attorney(s) and/or agent(s) associated with Eastman Kodak Company Customer No. 01333 to prosecute this application and to transact all business in the United States Patent and Trademark Office connected therewith. Please address all written
